## Aesthetic Theory

Theodor W. Adorno

Newly translated, edited, and with a foreword by Robert Hullot-Kent

Find a supported browser and system requirements from the Netflix support site. This is in-part thanks to Windows 10 S. For \$699, you get a high-quality screen, keyboard and trackpad. If you'd like to remove a downloaded movie or TV show from your laptop, tap the Downloaded icon under the content listing and select Manage > Delete. You should see your downloaded movie or TV show listed. In this window, click the text field and enter a new name for your PC. In Settings, from the sidebar to the left, select "System." On the "System" page, scroll all the way down the right pane and select "About." On the "About" screen that opens, from the top-right corner, choose "Rename this PC." A window with the title "Rename Your PC" will open. Just be aware that not every movie and TV show is downloadable. For all the doom and gloom about the traditional PC, vendors still shipped 315 million laptop and desktop computers last year according to IDC, mostly running Windows. When you consider that Microsoft already receives licensing fees for every Android device shipped by most manufacturers, a truly free Windows license may end up being cheaper than a "free" Android license. While the Netflix app is free to download, you'll need an active Netflix subscription in order to start downloading movies and TV shows. Given that Microsoft isn't touching its traditional laptop and desktop licensing business, the free version of Windows hardly qualifies as a gambit. To bring your PC's new name into effect, restart your PC. Browse the listings and tap the movie or TV show you'd like to download. This makes it easier to find your PC on a network with several other machines. It's important to assign a unique name to your PC, especially if it's connected to a network. How do I transfer downloaded Netflix movies on my laptop? RELATED: How to Turn Off Transparency in Windows 11 Use a Graphical Method to Change Your Windows 11 PC Name The graphical method uses Windows 11's built-in Settings app to change your PC's name. It's safe to assume many of those users are set on typical desktop applications instead, so there's less potential for Microsoft to make money after selling the copy of Windows, much less giving it away. Hover over the dropdown menu in the top right and click Account. If you've reached this limit on your laptop, you'll need to delete titles in order to make space for new ones. Your only options are to install Windows 10 on your Mac using Boot Camp, or stream Netflix from an iPad or other iOS device using AirPlay. With these devices, Microsoft has a much better chance of building an ecosystem, and in turn make money by selling apps, service subscriptions and content, hopefully making up for the lost Windows license sale. With a free Windows license, phone and tablet makers can also lower the prices of their hardware to better compete with Android devices that are dominating in market share. You can click "Restart Later," but in that case, your PC won't use the new name until you reboot it. After installing the Netflix app, you're only a few steps away from downloading your favorite Netflix movies and watching them offline: Launch the Netflix app on your laptop. This article explains how to download Netflix movies and TV shows to your Windows laptop or desktop for offline viewing. (Windows 8's inability to run on less than 2 GB of RAM and 32 GB of storage is also a major factor, but those requirements will be halved in the spring update for Windows 8.1.) A free version may not be as necessary for larger tablets, because customers seem comfortable paying higher prices for these more laptop-like devices—and in any case, Microsoft has to draw the line somewhere. At the top of the "System" page, you'll see your PC's new name. While downloads are available on all Netflix plans, the number of devices that you can have downloads on is limited by the plan you're subscribed to: Basic plan: 1 device Standard plan: 2 devices Premium plan: 4 devices If you've reached your device limit, you'll need to remove devices linked to your Netflix account in order to start downloading movies on your laptop. Unfortunately, there is no Windows 7 Netflix app or support for downloading movies from Netflix with this version of Windows. Microsoft is effectively giving up that revenue on Windows Phone, and on Windows tablets with screens smaller than 9 inches. So buying the Surface Laptop will also net you a few saved pennies. Conclusion! If you're in the market for a new Windows 10 S device but aren't sure what you want, consider the recommendations listed here. Smart Downloads is a feature that's turned on by default and helps you save space by deleting TV episodes you've watched. Then, at the bottom of the window, click "Next." On the next screen of the "Rename Your PC" window, click "Restart Now" to restart your PC. You can also manually search for movies and TV shows in other categories. Netflix also has a limit of 100 downloads per device. Best overall Best budget Best for schools Best 2-in-1 Best for creativity The Surface Laptop was built from the ground up with Windows 10 S in mind. Do this by pressing the Windows+I keys at the same time. Here's how: Sign in to Netflix from your browser. It's superb for writing long essays in Microsoft Office, or browsing the web in Edge on a day-to-day basis. Once the download is complete, click the Menu icon again and select My Downloads. Lower prices are less of a necessity in the U.S. smartphone market, where carrier subsidies keep prices down already, but it could be a boon for overseas adoption. Download the Netflix Windows app from the Microsoft Store. Select Available for Download from the main menu and browse through titles. Click the Download icon to begin downloading your selected movie or TV show. This is a major change in business model for Microsoft, which makes nearly a quarter of its revenue from licensing Windows to PC makers and consumers. It's Microsoft-made, meaning you can guarantee it'll remain supported with driver and firmware updates. There's no reason whatsoever for Microsoft to crater that business. To change the downloads location, open the Netflix app on your device. Different usage, different price Smartphones and small tablets, however, are geared toward using apps, listening to music and watching video. Changing your PC's name to something that you can easily recognize ensures that your PC is always identifiable. Manufacturers simply have to charge users more if they're paying for a Windows license. To start, open the Settings app on your PC. You can confirm this by heading into Settings > System. The Netflix app is available as a free download from the Microsoft Store, which is easily accessible from any Windows 10 laptop. Select Menu > Profile > App Settings > Download Location and choose your SD card. If you try to navigate to a different menu, you'll be greeted by the notification below. There are a few reasons why you may have trouble downloading Netflix movies to your laptop. Your PC's name also appears in system information as well as in the devices list on the Microsoft site. Netflix downloads are available on desktops, laptops, and tablets running Windows 10 Version 1709 or later. Overall, we think the Surface Laptop is the best Windows 10 S PC you can buy right now. Android tablets often sell for \$200 or less, but Windows tablets are all priced at \$250 and up, and that's partly because of licensing costs. And for tablets, it's a huge deal. The newly revealed "Windows for the Internet of Things," a version of Windows built for connected devices, such as wearables, speaker systems and even refrigerators, will also be free. If this is your first time logging into the app, you should be greeted by a pop-up notification with a link to downloadable movies and TV shows. But it is a big bet that Microsoft's huge desktop and laptop licensing business will stabilize, freeing up the company to take more drastic measures in areas where it has struggled. No free Windows for you! One reason Microsoft isn't extending the deal to larger PCs—despite previous suggestions to the contrary—is obvious: The existing Windows licensing business is a cash cow. Click it to begin playback. If you can't locate the Microsoft Store from your desktop or taskbar, just type "Microsoft Store" into the Windows search bar to quickly find it. If you'd like to change this name to your liking, there are both graphic and command-line ways to do so. When your PC restarts, it will be using the newly specified name. It may even pay off in the United States down the line, with Verizon, AT&T and T-Mobile now offering subsidy-free options. Thanks for letting us know! Tell us why! To ensure you're able to access this without a Wi-Fi connection, it's recommended that you remain signed in to the Netflix app. When offline, you'll only be able to access the My Downloads tab. By default, Windows 11 automatically assigns a random name to your PC. It's also the most powerful offering on our list, sporting CPUs ranging from Intel Core m3 all the way up to Intel Core i7, with either 4GB, 8GB or 16GB RAM offerings. This confirms that your PC's name was successfully changed. You'll first need to download the Netflix app from the Microsoft Store, as Netflix won't let you download content from a browser. Microsoft's license needs to be free for Windows tablets to compete with Android tablets in price-conscious markets. You'll be able to watch anything listed under the My Downloads tab with an offline connection. We'll show you both. Besides, those traditional laptop and desktop users may be less inclined to buy apps from the Windows Store and use new Microsoft services such as Xbox Music, Xbox Video and Bing Smart Search. In addition, it has great battery life, lasting all day on a single charge before needing to hook up to a power outlet. Click the Download icon. (Though giving users free updates in perpetuity would be a nice touch.) Sure, Windows PCs have all the same services baked in as Windows tablets, but don't play: You spend all your time in the desktop anyway. While you can't transfer Netflix downloads from your laptop elsewhere, you can store downloads to an installed SD card on your Android device or Amazon Fire tablet. FAQ How do I download Netflix movies on a Windows 7 laptop? To use this method, open the "Start" menu and search for "Command Prompt." On the right of the search results, in the "Command Prompt" section, click "Run as Administrator." In the "User Account Control" prompt that opens, select "Yes." On the Command Prompt window, type the following command, replacing NewPCName with the new name for your PC, and then press Enter: wmic computersystem where name="%computername%" call rename name="NewPCName" Command Prompt will display a "Method Execution Successful" message. If you were to buy a similarly priced Surface Pro, the keyboard and trackpad come separately, adding an additional \$100 to your spend. This will bring your PC's new name into effect. Scroll down to Settings and click Sign out of all devices > Sign Out. Unfortunately, Netflix doesn't support downloading movies and TV shows for offline viewing on Mac, as there's no Netflix app for Mac. It will also automatically download the next available episode the next time you connect to Wi-Fi. You can turn Smart Downloads on and off from the My Downloads tab. For more information on how to download movies from Netflix to a Mac or iPad. Do this by typing the following command in Command Prompt and pressing Enter: shutdown /r And that's how you assign a custom name to your Windows 11 PC! In case you're using Windows 10, you can change the name of your PC, too. You can even get one with 1TB internal storage. What's more, thanks to the Alcantara fabric on the excellent keyboard, typing on this device feels amazing. Use a Command-Line Method to Change Your Windows 11 PC Name If you prefer command-line methods, there's a command to change your PC's name from Command Prompt. However, you can access Netflix from a web browser to stream content while you're online. RELATED: Change Your Computer Name in Windows 7, 8, or 10 One of the bigger announcements at Microsoft's Build conference on Tuesday was a plan to make Windows free on smartphones, handheld tablets, and small Internet-connected gadgets. When in doubt, look for the Download icon.
